
Table of Contents

Preface	i
1. Getting Started	1
1.1 Installing the Tools	1
1.2 Running the Example Server	3
1.3 Creating Your First Video Stream	4
1.4 Summary	7
2. Streaming Video On-Demand	9
2.1 Check Your Input	9
2.2 Processing the Video	10
2.3 Fragmented MP4	13
2.4 Deploying to a Server	14
2.5 Managing Your Media	17
2.6 Validating Your Video Streams	18
2.7 Summary	19
3. Live and Uninterrupted	20
3.1 Getting Ready for Live Streaming	20
3.2 Deploying a Live Stream	24
3.3 Playing Video in iOS	27
3.4 Implementing Live Rewind	29
3.5 Summary	30
4. Adaptive Streaming	31
4.1 Understanding Adaptive Streaming	31
4.2 Encoding the Variants	33
4.3 Preparing the Video Streams	35
4.4 Creating a Variant Playlist	38
4.5 Putting It All Together	41
4.6 Tracking Playback Statistics	45
4.7 Summary	50

5. More Clients.....	52
5.1 Playing Video in iOS (AV Foundation)	53
5.2 Creating a Roku Application	59
5.3 Playing HLS Video in Android	63
6. Enhancing Your Videos.....	68
6.1 Trick Mode	68
6.2 Mixing It Up	73
6.3 Right on Cue	79
6.4 Summary	84
7. Security.....	85
7.1 Streaming Video Securely	85
7.2 Encrypting the Videos	86
7.3 Authenticating Clients	94
7.4 Summary	100
8. Accessibility.....	101
8.1 Understanding Subtitles	101
8.2 Adding Subtitles to Videos	103
8.3 Summary	105
9. Streaming Video with HLS and Wowza.....	106
9.1 Installing Wowza	106
9.2 Streaming Video On-Demand	109
9.3 Streaming Live Video	110
9.4 Adaptive Streaming	112
9.5 Summary	121
A. An Encoding Primer	122
A.1 What is a container format?	122
A.2 Frame Rate, Resolution, and Bit Rate	123
A.3 I-Frames	124
A.4 Understanding Profiles and Levels	125
B. Codecs Reference	126
